

1 Introduction

This document will contain the implementation details for the design learning platform. It will be used to outline the implementation before it is developed.

2 Components

In this section, I will outline the relationship between the following components and the practical steps needed to establish the relationship:

1. Artha - Meaningful Programming Language
2. DAL - Design Abstraction Language
3. CSM - Computable Semantic Model
4. Engine - Semantic Reasoning Engine
5. SI - Synthesized Implementation
